HOW DO I PREPARE FOR MY MRI ?

You will need to read and complete the [MRI safety form](#) before your exam.

PREPARING FOR AN MRI EXAM

There is no special preparation for an MRI examination. There is no need for a change in daily routine. All prescription medications can be taken normally. However, patients undergoing MRI examination of the pelvis and abdomen will be asked not to eat or drink for 4 hours prior to imaging. No special preparation is required for other body examinations.

WHAT TO BRING TO YOUR MRI EXAM

If you have previous x-rays, CT scans, or MRI scans of the area that we will be scanning in your possession, bring them and any reports you have to your appointment.

Bring your completed MRI Safety Screening Form. Please bring your referral.

If you were injured at work or in an automobile accident, please bring along any claim information, such as claim numbers, insurance carrier, and contact person, so that we can bill the correct party.

WHAT TO WEAR TO YOUR MRI EXAM

You will be asked to change into a cotton gown. This is to eliminate any metal in the magnetic field that could cause a safety issue during the procedure. If changing your clothing is difficult, please come dressed in loose fitting, ease to remove clothing that is metal free. This includes no zippers, rivets, hooks, tags, and/or underwire bras. The MRI Technologist will then determine if the garment is MRI compatible. If not, you will be asked to change into one of our gowns for your MRI examination.
